

SLIP EB45 DIRECT SHARKBITE® PRESSURE REGULATING VALVES

Combine the reliability of a Cash Acme® pressure regulating valve with the quality of a SharkBite slip fitting. The slip feature allows you to cover a large variety of lay lengths to easily add a pressure regulating valve to an existing copper or CPVC line or to replace the current regulator in your system.

FEATURES & BENEFITS

Modular cartridge design reduces the number of parts requiring service:
Quick and easy service and reparability.

Instant push-fit connections for increased ease of use:
No soldering, glue or tools required to make connection.

Utilizes a slip feature for easy installation:
Install quickly on existing copper and CTS CPVC pipe.

Back-pass check mechanism integral with the cartridge:
Allows water to flow back through the regulator in the event that outlet pressure exceeds inlet pressure, as in the case of thermal expansion caused by water heating devices.

Every valve is tested for performance prior to shipping:
Specify and install with confidence.

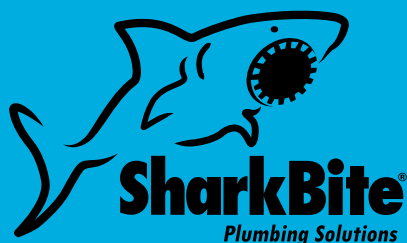

Assembled and tested in the USA:
Prepared in our manufacturing plant in Cullman, Alabama.

APPROVALS & LISTINGS

- ASSE 1003 • CSA B356 • IAPMO
- ASSE 1061 • NSF 372 • NSF 61

PRODUCT DESCRIPTION	PART #
SLIP EB-45 DIRECT SHARKBITE PRESSURE REGULATING VALVE	
1/2" EB45-SDSB Slip w/ Polymer Cap	24383-0045
1/2" EB45-SDSB Slip w/ Metal Cap	24474-0045
3/4" EB45-SDSB Slip w/ Polymer Cap	24384-0045
3/4" EB45-SDSB Slip w/ Metal Cap	24475-0045

*Also available in Direct SharkBite without Slip Feature
